MOHAN PRAKASH

B.Tech Computer Science & Engineering | Aspiring Data Scientist / Data Analyst

JECRC Foundation, Jaipur, Rajasthan | Phone: [Add Number] | Email: [Add Email]
LinkedIn: [Add LinkedIn] | GitHub: [Add GitHub]

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with a strong interest in Data Science, Data Analytics, Python programming, SQL, Artificial Intelligence and Machine Learning. Hands-on academic experience in data analysis, database management, web development and software projects. Familiar with data cleaning, exploratory data analysis, visualization, statistics, machine-learning fundamentals, problem solving and software development. Seeking an internship or entry-level opportunity to apply technical knowledge to real-world data-driven problems while continuously developing professional and communication skills.

EDUCATION

B.Tech – Computer Science & Engineering	**JECRC Foundation, Jaipur, Rajasthan** Currently pursuing | 5th Semester
Diploma	Diploma in Engineering | Rajasthan

Academic Performance: 3rd Semester CGPA: 8.8 | Latest academic CGPA information provided: 9.3

TECHNICAL SKILLS

Programming	Python, C/C++ fundamentals, SQL
Data Science	NumPy, Pandas, Matplotlib, Seaborn, Data Cleaning, EDA, Feature Engineering, Statistics, Probability
Machine Learning	Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Model Evaluation
Data & Databases	SQL, PostgreSQL, MySQL, DBMS, Database Design, Queries, Joins, Aggregation
Analytics & Productivity	Microsoft Excel, Data Analysis, Reporting, Basic Dashboard Concepts
AI	Artificial Intelligence fundamentals, Generative AI concepts, AI project development fundamentals
Web Development	HTML, CSS, JavaScript, Flask, REST/API fundamentals
Security & Tools	AES Encryption, bcrypt, Git, GitHub, Linux fundamentals, PyPDF2, pyttsx3
Core CS	DSA, Operating Systems, Computer Networks, Software Engineering, Software Testing, Compiler Design, TOC

DATA SCIENCE & ACADEMIC TOPICS

- Python for Data Science: variables, functions, OOP, files, exception handling, libraries and data-processing workflows.
- Data Analysis: data collection, data cleaning, missing values, outliers, transformation, exploratory analysis and reporting.
- Statistics & Probability: descriptive statistics, mean/median/mode, variance, standard deviation, probability distributions, correlation and basic hypothesis concepts.
- Data Visualization: charts, plots, dashboards, trend analysis and communicating insights.
- Machine Learning: training/testing data, preprocessing, regression, classification, clustering, overfitting/underfitting and evaluation metrics.
- SQL & DBMS: relational model, ER model, normalization, SQL queries, joins, subqueries, aggregation, transactions and database management.
- DSA: arrays, linked lists, stacks, queues, trees, graphs, searching, sorting, recursion, BFS, DFS, greedy algorithms and dynamic programming.
- Web/Data Applications: Flask, HTML/CSS/JavaScript, APIs, PostgreSQL/MySQL integration and basic deployment concepts.
- Computer Science: Operating Systems, Computer Networks, Software Engineering, Software Testing/STLC, Compiler Design, Theory of Computation, Computer Architecture and Discrete Mathematics.

SELECTED PROJECTS

SkillBridge AI – Skill & Career Platform — Developing a web-based platform concept for identifying skills, organizing learning paths and connecting users with career-oriented resources. Technologies: HTML, CSS, JavaScript, Python/Flask and AI concepts.

Secure File Storage System — Developed a secure web application concept using Flask, AES encryption, authentication/security concepts, PostgreSQL/MySQL integration and file upload management.

Text-to-Speech PDF Reader — Python project that extracts PDF text and converts it into speech. Technologies include PyPDF2 and pyttsx3, with a focus on document accessibility.

UNIPRO – E-commerce Website — Developing a professional e-commerce web application with product listing, cart functionality, responsive UI and front-end interaction using HTML, CSS and JavaScript.

Expense Tracker — Application concept for recording, categorizing and analyzing expenses to support personal financial tracking and basic data visualization.

CORE COMPUTER SCIENCE SUBJECTS

Data Structures & Algorithms • Database Management Systems • Operating Systems • Computer Networks • Software Engineering • Software Testing & STLC • Compiler Design • Theory of Computation • Computer Architecture • Discrete Mathematics • Web

Development • Artificial Intelligence • Data Science • Data Analytics • Probability & Statistics • Cloud/DevOps Fundamentals

PROFESSIONAL SKILLS

Problem Solving • Communication • Presentation • Team Collaboration • Leadership • Time Management • Critical Thinking • Adaptability • Continuous Learning • Analytical Thinking

CAREER INTERESTS

Data Science • Data Analytics • Machine Learning • Artificial Intelligence • Python Development • SQL & Business Analytics • Data-driven Applications

DECLARATION

I hereby declare that the information provided above is accurate to the best of my knowledge.
